

## Batoidea

Dimensions : chair  
h 78cm x w 107cm x d 61,6cm  
Weight: +/- 12 kilos

Dimensions :Footstool  
h 38,5cm x w 34,4cm x d 51cm  
Weight: +/- 2.5 kilos

Materials: Aluminum + Paint

Aptly named for the genus of fish which includes the elegant stingray, Batoidea is an extraordinary example of design and technology. Fluid and airy the chair defies practical conventions.

The technique for the 3d printed sand mold is the same one used to produce the internal core of the Ferrari engine. The finish resembles the Ferrari as well,

Batoidea is painted using the same method and quality control as the famous sports car.

Once again Peter Donders has stretched the possibilities of design with his technical expertise, and created a timeless piece of furniture

Limited Edition of 12
